## IRG-Rail Annual Reports

IRG-Rail has been publishing since 2013 its Annual Market Monitoring Reports, prepared by Market Monitoring Working Group.

The IRG-Rail report provides an annual overview of the economic conditions and market developments in the railway sector on the basis of the data collected by the national regulatory bodies, members of IRG-Rail. The report provides a comprehensive and detailed source of information for all interested parties. Additionally, each year IRG-Rail focuses in the report on a particular subject. UTK participates in the preparation of the reports.

Rail market monitoring is a vital instrument for enhancing market transparency, setting directions for the activities of regulatory bodies and encouraging market participants to improve their activities.
