English version of the report on the Polish railway market in 2018

20.12.2019

The report was created based on the data submitted to the Office of Rail Transport (Pol. Urząd Transportu Kolejowego, UTK) by railway undertakings and forms a supplement as well as broadens UTK's frequently released statistics, analyses and publications.

The publication contains data with regard to freight and passenger transport market, issues regarding railway infrastructure and rolling stock as well as the scale of employment on the part of carrier and infrastructure managers' companies. It allows for the analysis of trends and indication of changes with regard to fields, where the market rapidly grows, as well as which parameters show stabilisation or possible decreases.

Downloadable English version of the report can be found under this [address](#).
